Lineage

Site and planning regime boundaries are provided by the proponent when a request is made to nominate a site to Schedule 3,of the SEPP (State Significant Sites) 2005. Land Application (or site boundary) data is provided in digital format and is derived from various sources (e.g. site survey, hard copy maps, aerial imagery) with varying quality and accuracy. SEPP (State Significant Sites) 2005 relates directly to and adopts the accuracy of its reference dataset, Land and Property Information DCDB Data sets were topologically corrected to remove any gaps, overlaps and to ensure any planning regime datasets fall within the corresponding Land Application boundary. The GIS data may be subject to change as a part of quality control, or if the LEP is amended.
