Purpose	The aims of this Policy are:(a) to provide for healthy water catchments that will deliver high quality water while permitting development that is compatible with that goal, and (b) to provide that a consent authority must not grant consent to a proposed development unless it is satisfied that the proposed development will have a neutral or beneficial effect on water quality, and (c) to support the maintenance or achievement of the water quality objectives for the Sydney drinking water catchment.

a d P C d s d i i r a v r p	and legi data pro Planning Governi Departin data and standard data wil nvolvec auditors various requirer process	Itial dataset reflects the current planning legislation in NSW in particular the maps solution published on the NSW legislation website (www.legislation.nsw.gov.au). The oduction usually occurs in conjunction with the development of the Environmental g Instrument (EPI) it is connected to. Original data inputs are produced by Local ment or the Department according to map and data standards developed by the nent and published externally via the website. These data inputs are checked by d cartographic staff as well as planning staff internally against the map and data ds as well as for accurate content. Once the planning instrument is notified, the input I be incorporated into the relevant EPI datasets. The quality management processes d in the data production to this point are routinely screened by internal and external of cretification under ISO 9001 - Quality Management Systems. At this point the datasets are then combined into a new normalised data schema to suit the ments of the online Planning Viewer. This occurs via various automated ETL es. Although every care is taken in ETL processes to maintain accuracy sometimes ces between inputs and final normalised data can occur.
