

<b>Title</b>	Environmental Planning Instrument - Drinking Water Catchment
<b>Alternative title(s)</b>	EPI - DWC
<b>Abstract</b>	<p>This Spatial dataset shows land that has been identified as the Drinking Water Catchment. Development in the Drinking water catchment land must adhere to local provisions clause within the LEP or per the State Environmental Planning Policy (Sydney Drinking Water Catchment) 2011 where SEPP applies.</p> <p>Contact <a href="mailto:data.broker@environment.nsw.gov.au">data.broker@environment.nsw.gov.au</a> for a data package (shapefile)</p>

[WFS - Drinking Water Catchment](#)

Name: WFS - Drinking Water Catchment

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The WFS service exposes the following Protection layers:

- Acid Sulfate Soils
- Airport Noises
- Drinking Water Catchment
- Groundwater Vulnerability
- Mineral and Resource Land
- Obstacle Limitation Surface
- Riparian Lands and Watercourses
- Salinity
- Scenic Protection Land
- Terrestrial Biodiversity
- Wetlands
- Environmentally Sensitive Land

**Presentation form** mapDigital

**Edition** 1

**Dataset language** eng

### Metadata standard

**Name** ANZLIC Metadata Profile: An Australian/New Zealand Profile of AS/NZS ISO 19115:2005, Geographic information - Metadata

**Version** 1.1

**Dataset URI** <https://www.planningportal.nsw.gov.au/opendata/dataset/65812163-854f-49c9-8402-fe30a6778353>

**Purpose** The purpose of this dataset is to assist with identifying land in order to protect drinking water catchments by minimising the adverse impacts of development on the quality and quantity of water entering drinking water storages

**Status** completed

**Lineage**

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website ([www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au)). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant LEP datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
