

<b>Title</b>	Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005
<b>Alternative title(s)</b>	SREP (Sydney Harbour Catchment) 2005
<b>Abstract</b>	The spatial data represents Strategic Foreshore Sites Points, Heritage, Critical Habitat Area, Wetlands Protection Area, Special Purposes (Boat Repair Facilities and Commercial Marinas), Strategic Harbour Foreshore Sites, Foreshores and Waterways Area Boundary, Sydney Harbour Catchment, Zoning in Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005

[ArcGIS REST Services Directory - Sydney Regional Environmental Plan \(Sydney Harbour Catchment\) 2005](#)

Name: ArcGIS REST Services Directory - Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The URL directs users to the ArcGIS Server service directory of the Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005 layers - a view of REST API in HTML and allows users to: Browse the list of Layers. View Data for e.g. using ArcGIS.com View Map Service metadata: Initial/Full Extent, units, supported format types etc., Drill down to individual tables/layers, view schema and run queries.

Function: download

Name: WMS - Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

This service exposes the Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005 layers:

- Strategic Foreshore Sites Points
- Critical Habitat Area
- Wetlands Protection Area
- Special Purposes (Boat Repair Facilities and Commercial Marinas)
- Strategic Harbour Foreshore Sites
- Foreshores and Waterways Area Boundary
- Sydney Harbour Catchment
- Water Zoning

Function: download

**Lineage**

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website ([www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au)). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
