

Title	State Environmental Planning Policy No 19-Bushland in Urban Areas
Alternative title(s)	SEPP No 19-Bushland in Urban Areas
Abstract	The data represents Bushland in Urban Areas for State Environmental Planning Policy.
Resource locator	
<u>Data Quality Statement</u>	<p>Name: Data Quality Statement</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>Data quality statement for State Environmental Planning Policy No 19-Bushland in Urban Areas</p> <p>Function: download</p>
<u>JSON - State Environmental Planning Policy No 19-Bushland in Urban Areas data</u>	<p>Name: JSON - State Environmental Planning Policy No 19-Bushland in Urban Areas data</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>This service exposes the State Environmental Planning Policy No 19-Bushland in Urban Areas layer.</p> <p>Function: download</p>
<u>ArcGIS REST Services Directory - State Environmental Planning Policy No 19-Bushland in Urban Areas</u>	<p>Name: ArcGIS REST Services Directory - State Environmental Planning Policy No 19-Bushland in Urban Areas</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>The URL directs users to the ArcGIS Server service directory of the State Environmental Planning Policy No 19-Bushland in Urban Areas - a view of REST API in HTML and allows users to: Browse the list of Layers. View Data for e.g. using ArcGIS.com View Map Service metadata: Initial/Full Extent, units, supported format types etc., Drill down to individual tables/layers, view schema and run queries.</p> <p>Function: download</p>

Purpose	(1) The general aim of this Policy is to protect and preserve bushland within the urban areas referred to in Schedule 1 because of:(a) its value to the community as part of the natural heritage,(b) its aesthetic value, and (c) its value as a recreational, educational and scientific resource.(2) The specific aims of this policy are:(a) to protect the remnants of plant communities which were once characteristic of land now within an urban area,(b) to retain bushland in parcels of a size and configuration which will enable the existing plant and animal communities to survive in the long term,(c) to protect rare and endangered flora and fauna species,(d) to protect habitats for native flora and fauna,(e) to protect wildlife corridors and vegetation links with other nearby bushland,(f) to protect bushland as a natural stabiliser of the soil surface,(g) to protect bushland for its scenic values, and to retain the unique visual identity of the landscape,(h) to protect significant geological features,(i) to protect existing landforms, such as natural drainage lines, watercourses and foreshores,(j) to protect archaeological relics,(k) to protect the recreational potential of bushland,(l) to protect the educational potential of bushland,(m) to maintain bushland in locations which are readily accessible to the community, and (n) to promote the management of bushland in a manner which protects and enhances the quality of the bushland and facilitates public enjoyment of the bushland compatible with its conservation.
Status	completed
Spatial representation	
Type	vector
Geometric Object Type	surface
Spatial reference system	
Authority code	GDA94 Geographic (Lat\Long)
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Topic category	Environment
Keyword set	
keyword value	HUMAN-ENVIRONMENT-Planning

Originating controlled vocabulary	
Title	ANZLIC Search Words
Reference date	2008-05-16
Geographic location	
West bounding longitude	141
East bounding longitude	154
North bounding latitude	-37
South bounding latitude	-28
Vertical extent information	
Minimum value	-100
Maximum value	2228

Lineage This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
