

Title	State Environmental Planning Policy No 33-Hazardous and Offensive Development
Alternative title(s)	SEPP No 33-Hazardous and Offensive Development
Abstract	The data represents Hazardous and Offensive Development for State Environmental Planning Policy.
Resource locator

Purpose	This Policy aims:(a) to amend the definitions of hazardous and offensive industries where used in environmental planning instruments, and (b) to render ineffective a provision of any environmental planning instrument that prohibits development for the purpose of a storage facility on the ground that the facility is hazardous or offensive if it is not a hazardous or offensive storage establishment as defined in this Policy, and (c) to require development consent for hazardous or offensive development proposed to be carried out in the Western Division, and (d) to ensure that in determining whether a development is a hazardous or offensive industry, any measures proposed to be employed to reduce the impact of the development are taken into account, and (e) to ensure that in considering any application to carry out potentially hazardous or offensive development, the consent authority has sufficient information to assess whether the development is hazardous or offensive and to impose conditions to reduce or minimise any adverse impact, and (f) to require the advertising of applications to carry out any such development.	
Status	completed	
Spatial representation		
Type	vector	
Geometric Object Type	surface	
Spatial reference system		
Authority code	GDA94 Geographic (Lat\Long)	
Code identifying the spatial reference system	4283	
Equivalent scale	1:None	
Topic category	Environment	
Keyword set		
keyword value	HUMAN-ENVIRONMENT-Planning	
Originating controlled vocabulary		
Title	ANZLIC Search Words	
Reference date	2008-05-16	

Geographic location	
West bounding longitude	141
East bounding longitude	154
North bounding latitude	-37
South bounding latitude	-28

Lineage This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
