

Title	Environmental Planning Instrument - Environmental Conservation Area
Alternative title(s)	EPI - Environmental Conservation Area
Abstract	The layer aims to provide a focus for Environmental Conservation activity and protected areas expansions.

Unique resource identifier	
Code	23b3f1d5-312e-4f2f-9184-58d8c37a4616
Presentation form	Map digital
Edition	1
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://www.planningportal.nsw.gov.au/opendata/dataset/23b3f1d5-312e-4f2f-9184-58d8c37a4616
Purpose	The layer aims to provide a focus for Environmental Conservation activity and protected areas expansions.
Status	Completed
Spatial representation	
Type	vector
Geometric Object Type	surface

Spatial reference system	
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Topic category	environment
Keyword set	
keyword value	HUMAN-ENVIRONMENT-Planning
Originating controlled vocabulary	
Title	ANZLIC Search Words
Reference date	2008-05-16
Geographic location	
Vertical extent information	
Minimum value	-100
Maximum value	2228
Coordinate reference system	
Authority code	urn:ogc:def:cs:EPSG::
Code identifying the coordinate reference system	5711
Temporal extent	
Begin position	2014-05-23
End position	N/A
Dataset reference date	
Resource maintenance	
Maintenance and update frequency	As needed

Organisation name	Department of Planning and Environment
Responsible party role	pointOfContact
Lineage	<p>This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.</p>
