Title	Landsat foliage projective cover (FPC) time series summary products (25m) 1988- 2008				
Abstract	Landsat foliage projective cover (FPC) time series summary products are the result of statistical analysis of a time series stack of individual date FPC images. The products available are based on analysis of the 1988-2008 period and include variables such as slope, intercept, standard deviation and standard error, as image These products are created as an interim stage in the development of the woody extent and FPC product.

Purpose	To support the NSW Annual Report on Native Vegetation which is OEH's comprehensive summary of actions undertaken by private and public land manage to conserve and manage native vegetation. The annual report, which is produced at the end of each calendar year, comprises the Native Vegetation Report Card, the Woody Vegetation Change Report and the Compliance and Enforcement Report Card.				
Status	Completed				
Spatial representation type	grid				
Spatial reference system					
Code identifying the spatial reference system	4283				
Spatial resolution	25 m
