Re: Development Application – Smiggins Snowfactory

Dear Daniel,

Perisher is lodging a Development Application for the installation of a snow machine (Snow Factory) in the Smiggin Holes ski area that can produce snow at any temperature below 25 C.

The Snowfactory is housed within a portable structure comprising of two 40 ft shipping containers with ancillary plant on top and external staircase , to be erected on a retained and reinforced concrete slab.

The proposed site for the works is within the existing lease boundary for the Kaaten triple chairlift and is to be contained entirely in exotic grassland.

Should you have any questions, feel free to contact me.

Regards,

Andrew Kennedy
