Cemeteries as State significant Development Submission

This is good news for the people of NSW

The location of cemeteries is something that needs to be clarified and addressed

Cemeteries have historically been located on the outskirts of Townships and villages, they are a place of reflection and grieving

The current proposed cemetery for Wallacia is in the heart of the township and inappropriately located. Cemetery developments need to be located to have as minimal a social impact as possible to the residents of townships they are located in

Yours Sincerely

Frank Xerri
