

Integration APIs

Release Notes

29 April 2022

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs (where Council is the consent authority)

Please note, these APIs operate between NSW Planning Portal and IT systems of Councils.

There are two versions currently supported by the Department (DA V1 and DA V2).

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2031	DAV1	Council to ePlanning	Resend	Appropriate fix was given to the issue that was reported by the user, indicating the resend trigger was showing up for an in progress case.	No action required.
CONAPI-586	DAV2	Council to ePlanning	PendingLECDDecision	Authorization logic was verified against the end user's business id to fix the user reported error 'This user is	No action required.

Common APIs (Program-level enhancements that impact the common operations utilised by several service APIs)

Please note, these APIs operate between NSW Planning Portal and IT systems of Private Certifiers and the relevant Council. There are two versions currently supported by the Department (Common V1 and Common V2), however, Common V1 is reserved for consolidating the administrative functions (e.g. Document exchange, Reassign and Withdraw) that were previously repeated across multiple digital services.

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2004	Common V2	Council to ePlanning	GetCaseInfo	Additional functionality is introduced to allow for retrieval of historical information via getcaseinfo API where the users have consented to.	No action required.
CONAPI-495	Common V2	Certifier to ePlanning	OnlineCRCCaseDetails	Certifiers have been provisioned with a new API that returns the summary of all of the open / Certificate registered cases in its response, as per their requirement.	Certifiers using the OnlineCRCCaseDetails API are to review and consider adopting this enhancement if and when it is relevant to them.
CONAPI-495	Common V2	Certifier to ePlanning	GetCaseInfoSync	Users are provisioned with a new API that returns the exhaustive case details in the response in a synchronous manner.	Certifiers using the GetCaseInfoSync API are to review and consider adopting this enhancement if and when it is relevant to them.
CONAPI-583	Common V2	Certifier to ePlanning	CreateExhibition	ePlanning portal's action summary for DA and State DA has been enabled to display the exhibition related updates as per customer's request.	No action required.
