

Integration APIs

Release Notes

Aug 2022

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs

Please note, these APIs operate between NSW Planning Portal and Councils/CADNSW

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2386	DA V2	Council to ePlanning	Determine API	<p>A new field 'developmentDescription' is added in the determination API for the consent authority to provide the description about the development. This gives an opportunity for the consent authority to update the development description entered by the applicant. This description would be published in the Planning portal.</p> <p>This becomes applicable for certain determining authorities only.</p>	Councils using the DA service are to review and consider adopting this enhancement when it is relevant to them.

Release Notes

Aug 2022

INCAPI-2389	DA V2	ePlanning to Council	RequestOperationalConsent	<p>A new attribute 'dueDateForEvidenceAboutRelevantMatters' to capture the due date entered by the applicant while requesting for the operational consent is added.</p> <p>The status of the case would read 'Operational consent requested'.</p>	Councils using the DA service are to review and consider adopting this enhancement when it is relevant to them.
INCAPI-2356	DA V2	Council to ePlanning	ReviewRequestConsent	<p>When the consent authority receives the request to review the operational consent from an applicant for a DA,</p> <ol style="list-style-type: none"> Operational consent attribute's description is updated in YAML to reflect the modified label in the eplanning portal. It is modified to read 'Has satisfactory evidence been provided that the conditions have been addressed'. When 'Yes' is supplied for this attribute in API, case status would read 'Operational consent issued'. When 'No' is supplied for this attribute, the case status would read 'Operational consent declined'. Relevant update APIs will reflect the appropriate statuses. 'Operational consent requested' cases will now become available in the relevant matters work basket in 	Councils using the DA service are to review and consider adopting this enhancement when it is relevant to them.
