

# Integration APIs

## Release Notes

July 2022

### Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at [ePlanningAPI@planning.nsw.gov.au](mailto:ePlanningAPI@planning.nsw.gov.au).

### Online DA Service APIs

Please note, these APIs operate between NSW Planning Portal and Councils

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2077	DA V2	ePlanning to Council	CreateDA / UpdateDA	APIs are enabled to include all the changes relating to Housing SEPP (State environmental planning policy) changes that are done in the ePlanning Portal. This will become applicable for the cases that are created on or after 27 <sup>th</sup> May'22.  Newly added development type values such as Co-living housing, Seniors housing, independent living	Councils using the DA service are to review and consider adopting this enhancement when it is relevant to them.
