

Integration APIs

Release Notes

June 2022

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs

Please note, these APIs operate between NSW Planning Portal and Councils/CADNSW

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2177 & INCAPI-2190	DA V2	CADNSW to ePlanning	ProvideAddinfo	A new document type 'Digitised Plans' is introduced in the case that is used for attaching the digitised plan images received from CADNSW. This document category will be made available to attach the incoming digitised files from CADNSW and will not be available as a general category in the case for any other use. A new tooltip is introduced	CADNSW to review and consider adopting this enhancement as relevant.

				in the ePlanning Portal that indicates the source of the document.	
INCAPI-2076	DA V1 & DA V2	ePlanning to Council	UpdateDA	Change is introduced in this API to ensure that it identifies the 'PPS internal' tagged documents and would restrict the documents from sharing it with the councils, as the documents are relevant to Planning internal team only.	No Action required.
MRC-446	DAV2	ePlanning to Council	CreateDA	Case status change to reflect the appropriate user interface status (e.g Pending Lodgement) is incorporated. Previously it was showing the database status. (e.g Pre-Lodgement).	No Action required.

State DA Service APIs

Please note, these APIs operate between NSW Planning Portal and agency.

There is only one version currently supported by the Department (state DA V1)

Jira Ticket Ref	API version	Data Flow	Operations	Description	Action
INCAPI-1981	State DA V1	ePlanning to Agency	AcceptReturn	An outbound event is enabled to be triggered to the agency whenever the agency officer returns the application.	No Action required.

June 2022

Online CDC Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council).

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-1886	CDC V1	ePlanning to Certifier	CreateCDC/UpdateCDC	Two new attributes are added into the API that captures data when the applicant indicates that they have applied CDC via ePlanning portal & the relevant ePlanning portal's CDC application number. This is in line with ePlanning portal changes.	Certifiers using the CDC application are to review and consider adopting this enhancement if and when it is relevant to them.
INCAPI-2200	CDC V1	Certifier to ePlanning	Determination	In line with ePlanning portal's UI, certifier declarations are replaced with a disclaimer text under the heading confirmations. Validations for declarations have been removed to accommodate the alternate disclaimer text changes. Yaml is updated with the appropriate descriptions.	Certifiers using the CDC application are to review and consider adopting this enhancement when it is relevant to them.
INCAPI-2094	CDC V1	ePlanning to Certifier	CreateCDC/UpdateCDC/ EditRegisteredpractioner	New practitioner class values as part of Practitioner nomination on CDC cases are being added in ePlanning portal. In line with ePlanning portal's changes, APIs have also ensured the new values are coming through using the APIs. Yaml changes are done appropriately to indicate the new list values.	Certifiers using the CDC application are to review and consider adopting this enhancement when it is relevant to them.

Integration APIs

Release Notes

June 2022

Online Concurrence and Referral Service APIs

Please note, these APIs only operate between NSW Planning Portal and IT systems of relevant State Agencies.

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-1931	CNR V1	ePlanning to agency	CNRCancel	Whenever DA gets withdrawn, the relevant CNRCancel API is uplifted to carry its cancel date as the DA withdrawal date and the reason will read 'DA has been withdrawn'	No Action required.

Online Post-consent Certificate Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council)/CADNSW

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2185 & INCAPI 2193-2196	PCC V1	Certifier to ePlanning	NotifyFireSafetyIssue	A new inbound operation is added to report significant fire safety issues to the councils. This is in line with the legislative reference Section 60 of the EP&A (Development Certification and Fire Safety) Regulation 2022. This operation is applicable to CC, OC, SWC, SC, PCA certificates.	Certifiers using the PCC application are to review and consider adopting this enhancement when it is relevant to them.

Integration APIs

Release Notes

June 2022

INCAPI-2179 & INCAPI-2197 to 2199	PCC V1	Certifier to ePlanning	NotifyCriticalStageInspection	A new inbound operation is added to notify applicant of the critical stage inspections to ensure there is a record of each of the inspections carried out by the certifier under the clause 162A or 162AB in line with the ePlanning portal's changes. This operation is applicable to CC, OC, SWC, SC, PCA certificates.	Certifiers using the PCC application are to review and consider adopting this enhancement when it is relevant to them.
INCAPI-2192	PCC V1	Certifier to ePlanning	Determination	In line with ePlanning portal's UI, certifier declarations are replaced with a disclaimer text under the heading confirmations to comply with the compliance changes. Validations for declarations have been removed to accommodate the alternate disclaimer text changes. Yaml have been updated with the appropriate descriptions.	Certifiers using the PCC application are to review and consider adopting this enhancement when it is relevant to them.
INCAPI-2178	PCC V1	CADNSW to ePlanning	ProvideAddinfo	A new document type 'Digitised Plans' is introduced in the case that is used for attaching the digitised plan images received from CADNSW. This document category will be made available to attach the incoming digitised files from CADNSW and will not be available as a general category in the case for any other use. A new tool tip is introduced in the ePlanning Portal that indicates the source of the document.	CADNSW to review and consider adopting this enhancement as relevant
INCAPI-2176	PCC V1	Certifier to ePlanning	Assessment	Assessment API is fixed to ensure appropriate error message when attempting to perform	No Action required.

Online Certificate Registration APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Private Certifiers and the relevant Council.

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2257	CR V1	Certifiers to ePlanning	OnlineCRCaseDetails	API is fixed to ensure case details of the certifiers are retrieved using the organisation details associated to the user registration profile.	No action required.

Common APIs (Program-level enhancements that impact the common operations utilised by several service APIs)

Please note, these APIs operate between NSW Planning Portal and IT systems of Private Certifiers and the relevant Council. There are two versions currently supported by the Department (Common V1 and Common V2), however, Common V1 is reserved for consolidating the administrative functions (e.g. Document exchange, Reassign and Withdraw) that were previously repeated across multiple digital services.

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2207	Common V2	ePlanning to Certifiers/Councils	UpdateAdditionalInfo	Maximum size limit restriction for the response details in the updateadditionalinfo operation has been removed to be in line with ePlanning portal.	No action required.
