

# Integration APIs

## Release Notes

01 April 2022

### Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at [ePlanningAPI@planning.nsw.gov.au](mailto:ePlanningAPI@planning.nsw.gov.au).

### Online DA Service APIs (where Council is the consent authority)

Please note, these APIs operate between NSW Planning Portal and IT systems of Councils.

There are two versions currently supported by the Department (DA V1 and DA V2).

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-1780	DAV2	Inbound	Preliminary Assessment and Determination API	Inbound APIs were uplifted to be in line with the ePlanning portal enhancements. 3 new values were added to the existing attribute 'determiningBody' in the preliminary assessment API and 2 new values for the determinationAuthority attribute.	Councils using the DA Online Service API are to review and consider adopting this enhancement as relevant

# Integration APIs

## Release Notes

01 April 2022

INCAPI-1707	DA V1	Reassign	Inbound	API codes are updated to ensure the users are able to re-assign the case through API even with case insensitive email address in the payload construct.	No Action required.
-------------	-------	----------	---------	---	---------------------

### Online CDC Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Certifiers (Private and Council).

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-1781	CDCV1	Outbound	CreateCDC & UpdateCDC	In line with the UI enhancements, APIs are uplifted to capture DBP exempt reason's list values for Class 2 development types.	Certifiers using the CDC Online Service API are to review and consider adopting this enhancement as relevant
INCAPI-1760	CDCV1	Inbound	Provideddevspec	In line with the UI enhancements, additional validations are incorporated to alert the certifiers to edit the CDC application when relevant class 2 of developments are not chosen by the applicant during the submission process.	No action required.
