

Integration APIs

Release Notes

May 2022

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online CDC Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Councils or private certifiers.

Current version of API supported by the Department - CDC V1.

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-2095	CDC V1	ePlanning to certifier	Reassign	Whenever case is reassigned by certifiers, outbound Reassign API is triggered from ePlanning to update reassignment.	Certifiers using the Reassign API are to review and consider adopting this enhancement if and when it is relevant to them.

Release Notes

May 2022

Online Post-Consent Certificate Service APIs

Please note, these APIs operate between NSW Planning Portal and IT systems of Councils or private certifiers.

Current version of API supported by the Department - PCC V1.

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-2045	PCC V1	ePlanning to Certifiers	UpdateAdditionalInfo	CadNSW receives the proposed plans from the ePlanning portal and they send back the digitised version of the plan images to ePlanning portal. This would be attached to the case. The digitised version of the plan images are now made available to the certifiers through this API, that could support certifier's assessment process.	Certifiers are to review and consider adopting this enhancement if and when it is relevant to them.
INCAPI-2025	PCC V1	ePlanning to Certifiers	CreatePCC & UpdatePCC	APIs are enhanced to accommodate the applicant entered additional builder details for CC, OC, SWC, PCA certificates in line with ePlanning portal's changes.	Certifiers using the CreatePCC and UpdatePCC APIs are to review and consider adopting this enhancement if and when it is relevant to them.
INCAPI-1977	PCC V1	ePlanning to Certifiers	Reassign	Whenever certifiers reassigns the case, ePlanning system triggers the reassign API to certifiers.	Certifiers using the Reassign API are to review and consider adopting this enhancement if and when it is relevant to them.

Integration APIs

Release Notes

May 2022

INCAPI-1953	PCC V1	ePlanning to Certifiers	Multiple inbound operations	APIs are enabled to display an appropriate error message to indicate that the user cannot perform significant operations via API when the user is editing a case in ePlanning portal. Applies to CC and OC certificates. Applies to Inbound operations that has the edit option available in ePlanning portal.	No action required.
-------------	--------	-------------------------	-----------------------------	--	---------------------

Online Post-Consent Certificate Service APIs (Consumed by CADNSW – Below changes apply to CADNSW only)

Please note, these APIs operate between NSW Planning Portal and CADNSW IT systems.

Current version of API supported by the Department - PCC V1.

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-2043	PCC V1	ePlanning to CADNSW	CreatePCC	All subdivision certificates created in ePlanning system would be sent to CADNSW through this API to digitize the relevant plan images.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.
INCAPI-2044	PCC V1	ePlanning to CADNSW	UpdatePCC	Updated information/documents for a subdivision certificate from ePlanning system would be sent to CADNSW to digitize the relevant documents when required.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.

Integration APIs

Release Notes

May 2022

INCAPI-2045	PCC V1	ePlanning to CADNSW	UpdateAdditionalInfo	Additional information/documents updated by the applicant for a subdivision certificate that's created in ePlanning system would be sent to CADNSW to digitize the relevant document when required.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.
INCAPI-2047	PCC V1	CADNSW to ePlanning	Provideaddinfo	This API has been provisioned to CADNSW to send the relevant digitised plan images to ePlanning, which will thereafter be used for the assessment process by the certifiers.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.

Online DA Service APIs (where Council is the consent authority)

Please note, these APIs operate between NSW Planning Portal and IT systems of Councils.

There are two versions currently supported by the Department - DA V1 and DA V2.

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-2026	DAV2	ePlanning to Council	UpdateadditionalInfo	CadNSW receives the proposed plans from the ePlanning portal, and they send back the digitised version of the plan images to eplanning portal. It is then attached to the case. The digitised version of the plan images are now made available to the certifiers through this API, that could support certifier's assessment process.	Council to review and consider adopting this enhancement if and when it is relevant to them.

Integration APIs

Release Notes

May 2022

INCAPI-1955	DAV1 & V2	Council to ePlanning	Multiple inbound operations	APIs are enabled to display an appropriate error message to indicate that the user cannot perform significant operations via API when the user is editing a case in ePlanning portal. Applies to Inbound operations that has the edit option available in ePlanning portal.	No action required.
-------------	-----------	----------------------	-----------------------------	---	---------------------

Online DA Service APIs (Below changes are applies to CADNSW teams only)

Please note, these APIs operate between NSW Planning Portal and CADNSW IT systems.

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-2039	DAV2	ePlanning to CADNSW	CreateDA	All subdivision related applications created in ePlanning system would be sent to CADNSW through API to digitize the relevant plan images. The digitised version of the plan images is then sent back to the councils to support their assessment process.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.
INCAPI-2042	DAV2	ePlanning to CADNSW	UpdateAdditionalinfo	Additional information/documents updated by the applicant for a subdivision related application that's created in ePlanning system would be sent to CADNSW to digitize the relevant document when required.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.

Integration APIs

Release Notes

May 2022

INCAPI-2041	DAV2	ePlanning to CADNSW	UpdateDA	Updated information/documents for a subdivision related application that's created in ePlanning system would be sent to CADNSW to digitize the relevant document when required.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.
INCAPI-2046	DAV2	CADNSW to ePlanning	Provideaddinfo	This API has been provisioned to CADNSW to send the relevant digitised plan images to ePlanning portal, which will thereafter be used for the assessment process by the council officers.	CADNSW are to review and consider adopting this enhancement if and when it is relevant to them.

State DA Service APIs

Please note, these APIs operate between NSW Planning Portal and agency.

There is only one version currently supported by the Department - StateDA V1

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-1955	State DA V1	Agency to ePlanning	Multiple inbound operations	APIs are enabled to display an appropriate error message to indicate that the user cannot perform significant operations via API when the user is editing a case in ePlanning portal. Applies to Inbound operations that has the edit option available in ePlanning portal.	No action required.

Integration APIs

Release Notes

May 2022

Online Certificate registration Service API

Please note, these APIs operate between NSW Planning Portal, Private certifier and Council.

There is only one version currently supported by the Department - CR V1

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-1976	CR V1	ePlanning to Certifiers	Reassign	Whenever case is reassigned by certifiers, outbound Reassign API is triggered from ePlanning to update reassignment.	Certifiers using the are to review and consider adopting this enhancement if and when it is relevant to them.

Online BIC Application Service API

Please note, these APIs operate between NSW Planning Portal, Applicant and Council.

There is only one version currently supported by the Department - Online BIC V1

Issue key	API version	Data Flow	Operations	Description	Action
INCAPI-1975	Online BIC V1	ePlanning to Certifiers	Reassign	Whenever case is reassigned by council officers, outbound Reassign API is triggered from ePlanning to update reassignment.	Certifiers using the are to review and consider adopting this enhancement if and when it is relevant to them.
