

Integration APIs

Release Notes

Oct 2022

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs

Please note, these APIs operate between NSW Planning Portal and Councils/CADNSW

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2540	DA V2	ePlanning to Council	CreateDA/UpdateDA	In line with ePlanning Portal's change, new attributes are added in the API to capture if the application is biodiversity compliant development/private land conservation agreements.	Councils using the DA are to review and consider adopting this enhancement when it is relevant to them.
INCAPI-2487	DA V2	Council to ePlanning	GetCaseinfoSync	GetCaseInfoSync, which enables the relevant organisation to request the latest application from the planning portal. The case details will be sent synchronously.	No action required

Oct 2022

State DA Service APIs

Please note, these APIs operate between NSW Planning Portal and agency.

There is only one version currently supported by the Department (state DA V1)

Jira Ticket Ref	API version	Data Flow	Operations	Description	Action
INCAPI-2541	State DA	ePlanning to Agency	CreateStateDA/UpdateStateDA	In line with ePlanning Portal's change, new attributes are added in the API to capture if the application is biodiversity compliant development/private land conservation agreements.	Agencies using the StateDA are to review and consider adopting this enhancement when it is relevant to them.
INCAPI-2521	State DA	ePlanning to Agency	UpdateAdditionalInfo	Appropriate fix to ensure correct request dates and the response dates in the UpdateAdditionalInfo API is provided.	No actions required.

Online Concurrence and Referral Service APIs

Please note, these APIs only operate between NSW Planning Portal and IT systems of relevant State Agencies.

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-2558	CNR V1	Agency to ePlanning	Accept Return	Maximum length for the reject reason amended in the API documentation to read 2000 characters. For the existing customers, API will continue to work as it is.	No actions required.
