

Integration APIs

Release Notes

July 2024

Overview

As part of the Department's commitment to improving the ePlanning Digital Services on the NSW Planning Portal, we regularly deploy fixes where required and introduce minor enhancements to APIs to support policy changes. These deployments occur on a monthly schedule and are backward compatible, meaning that code changes are not required at the stakeholder end.

This month's release note captures all fixes and enhancements that have been deployed under each digital service API. Some items may require configuration changes on the part of the stakeholders – see table below.

Please note that this document is designed to support the technical staff responsible for the maintenance of stakeholder APIs. It ensures that the integration between the ePlanning Portal and stakeholder IT systems continues to improve.

If you have any questions about the below updates, please contact us at ePlanningAPI@planning.nsw.gov.au.

Online DA Service APIs (where Council is the consent authority)

Please note, these APIs operate between NSW Planning Portal and IT systems of Councils.

There are two versions currently supported by the Department (DA V1 and DA V2).

Jira Ticket Ref	API version	Data flow	Operation	Description	Action(s)
INCAPI-3893	DA V2	Council to ePlanning	Resend/GetCaseInfo	Resend API option is introduced in ePlanning portal for the contribution cases that enables the consent authority to receive the contribution case details. Contribution case details can also be retrieved through Getcaseinfo API.	Councils using the DA APIs are to review and consider adopting this enhancement if it is relevant to them.
